Education

Wilfrid Laurier University

Bachelor of Science in Computer Science, Minor in Statistics, Co-op Program

Waterloo, ON

Sep. 2023 – Aug. 2027

- **Clubs:** Laurier Computing Society
- **Related Credits:** Data Structures 1 and 2, Object Oriented Programming, Microprocessors, Advanced Calculus (1, 2, and 3), Discrete Mathematics, Linear Algebra, Machine Learning

Technical Skills

Languages: Python, Java, JavaScript, HTML, CSS, C, R, SQL

Frameworks: React, Next.js, Tailwind, Node.js, FastAPI

Developer Tools: Power Automate, Power BI, Git, GitHub, Docker, Linux, Markdown, VS Code, PyCharm, Eclipse

Libraries: SpaCy, pdf-lib, Pydantic, Leaflet, Socket.io

Experience

Data Analyst

May 2026 – Present

Yamaha Motor Canada Ltd.

Toronto, ON

- Built **statistical learning and machine learning models** to forecast demand and analyze competitor pricing, improving the accuracy of month-over-month and year-over-year projections.
- Developed an **aggregate buyer-behavior analytics dashboard** combining product-level purchase records with third-party demographic probability data, using a privacy-conscious, aggregate-only methodology.
- Enabled faster **FP&A** decisions by building executive-facing **Power BI dashboards** for forecasting, budgeting, and monthly reviews.
- Ensured reliable Power BI refreshes by developing **Python data pipelines** that cleaned, standardized, and merged internal sales data with Statistics Canada economic indicators.

AI Enablement Intern

Sept 2025 – Dec 2025

Jonas Software | Constellation Software (TSX:CSU)

Toronto, ON

- Designed and delivered end-to-end **AI workflows** using **Power Automate**, n8n, and LLMs to support HR, finance, and internal operations.
- Automated candidate evaluation, invoice analysis, and financial workflows by building **AI-powered systems** that transform unstructured data into structured outputs.
- Supported **AI governance and education** by maintaining the **Jonas AI Hub**, authoring SOPs, and assisting with hands-on workshops across departments.

Projects

🐙 LuckyLease | Web Application *Next.js, Tailwind, Typescript Express.js, Supabase, Socket.io, PostgreSQL*

- Developed a **web-based sublet marketplace** with Next.js 14 and Supabase PostgreSQL for fast **search**, **list**, and **filter** functionality.
- Engineered **Lucky Opinion AI** using the **Google Gemini API** to compute **compatibility ratings (0–10)** and generate **pros and cons**.
- Integrated **Socket.io real-time chat**, **JWT-based authentication**, and **interactive mapping** for secure, location-based **property discovery**.

🐙 CVLens | Web Application

Python, Next.js, Tailwind, FastAPI, SpaCy, Docker, Git

- Developed a **web app** that extracts structured data from uploaded resumes (**PDF/DOCX**) to automate the application process, eliminating the need for manual data entry.
- Built a **NLP model** with SpaCy (NER) to accurately extract resume details, creating a dataset of over 200 resumes.
- Built a **RESTful API** with FastAPI to process uploads and serve structured JSON responses.
- Designed a clean, **easy-to-use frontend** using Next.js that fetches data from the API gateway.

🐙 Poke-Pal | Full-Stack Web App

Python, JavaScript, HTML, FastAPI, Tailwind, Next.js, PokéAPI, Git

- Built a **full-stack web app** with a Pokedex-style interface that matches your personality to a Pokémon.
- Engineered a **custom backend** integrating the Gemini AI API to analyze user responses and extract personality traits.
- Fetched Pokémon data from PokéAPI and built an interactive React and Tailwind UI to display it.
